Divya Nirankari

Artificial Intelligence Engineer

Surat, Gujarat, India | dvnirankari@gmail.com | +91 9265768306 / +91 7284906551 | LinkedIn | GitHub | GitHub | LinkedIn | Email |

Professional Summary

Artificial Intelligence Engineer specializing in Healthcare AI, Deep Learning, and biomedical signal analysis. Designed and developed production-grade machine learning models for early-stage disease diagnosis, including cardiac abnormality detection via ECG and Parkinson's disease analysis. Demonstrated expertise in time-series classification, CNNs, and 1D ResNet to deliver impactful medical solutions. Dedicated to driving advanced AI research and scalable data-driven systems for intelligent healthcare.

Education

Master of Computer Applications (MCA) 2022 - 2024
Gujarat Technological University
Bachelor of Computer Applications (BCA) 2019 - 2022
Gujarat University

Professional Experience

Tech Corp —
Artificial Intelligence Engineer

- Developing and deploying advanced machine learning models for healthcare applications.

Software Solutions Inc. —
Python Developer

- Developed scalable backend services using FastAPI and Django.
- Optimized database queries and built RESTful APIs to support high-traffic web applications.

Technical Projects

Software & General

Deep Learning for Cardiac Abnormality Detection Using Wearable ECG Data (Python, TensorFlow/PyTorch, NumPy, SciPy, CNN, 1D ResNet)

- Applied signal preprocessing techniques (noise filtering, normalization, segmentation) for cardiac abnormalities using ECG signals.
- Implemented deep learning models CNN and 1D ResNet for time-series classification.
- Optimized model performance for early-stage abnormality detection.

Parkinson's Disease Detection System (AI, ML, Image Processing)

- Developed an AI-Based System based on Spiral Drawing Analysis.
- Applied image processing and machine learning techniques.
- Identified early-stage Parkinson's symptoms.

AI-Based Disease Prediction System (Machine Learning, Classification, Data Preprocessing)

- Built ML models to predict diseases using patient datasets.
- Applied classification algorithms and feature engineering.
- Improved accuracy through data preprocessing and model tuning.

Chatbot Cloud Project (AI, Redis, WebSockets, K6, ChatGPT API)

- Built a real-time chatbot system integrated with WhatsApp, Telegram, and Facebook Messenger.
- Implemented AI-based intent recognition and fallback responses.
- Optimized API with Redis Cache, WebSocket Auto-Reconnect, and Query Indexing.

Financial Portfolio Management Project (AI, Financial Data Analysis)

- Implemented AI-based risk assessment and asset allocation.
- Utilized historical financial data for market trend forecasting.
- Provided real-time investment tracking through dashboards.

DropIt.my - Delivery Platform (Backend APIs, Database Optimization)

- Developed backend APIs for a logistics platform.
- Implemented delivery scheduling algorithms and tracking system.
- Optimized database queries for real-time logistics management and performance.

Carefare Services – On-Demand Services Platform (Web Platform, Authentication)

- Built a web platform for hiring service professionals.
- Developed a booking and payment system for service scheduling.
- Implemented user authentication and optimized search and filter functionality.

Card Prediction System (AI, Random Forest, LSTM, MySQL)

- Built an AI-driven card pattern prediction system.
- Used historical draw data stored in MySQL.
- Developed prediction models using Random Forest & LSTM.

Research & Academic Work

Cardiac Abnormality Detection via ECG 2024

Technical Skills

- **Programming & Databases:** Python, SQL, PostgreSQL, Redis, MongoDB
- **AI & Machine Learning:** Supervised Learning, Random Forest, Classification Models, CNN, LSTM, 1D ResNet, Data Preprocessing, Feature Engineering, Biomedical Signal Processing (ECG)
- **Backend & Cloud:** Django, FastAPI, RestAPIs, GraphQL, AWS
- **Tools & Testing:** Git, Github, K6 API Testing, Data Analysis (Pandas, Numpy)

Achievements & Awards

- **Object Detection Model**
- **Customer Churn Prediction Model**
- **PostgreSQL Optimization**
- **Most Diligent Employee**

Certifications

- **Data Structure Excellence Award** (2018)
- **Database Management System Award** (2018)
- **Student of the Year** (2019)
