간단 소개

Artificial Intelligence Engineer with a strong focus on Healthcare AI, Deep Learning, and biomedical signal analysis. Experienced in developing AI models for real-world medical applications, including cardiac abnormality detection using ECG signals and Parkinson's disease diagnosis. Skilled in deep learning architectures, machine learning, and data-driven system design, with a research-oriented mindset toward early diagnosis and intelligent healthcare systems. Actively seeking to contribute to advanced AI research and impactful real-world healthcare solutions.

학력

2020/01 ~ 2022/01
(2년 1개월)

석사

Veer Narmad South Gujarat University
Computer Application

2017/01 ~ 2020/01
(3년 1개월)

학사

Vivekanand College of Computer Science
Computer Application

경력

2022/03 ~ 2023/04
(1년 2개월)

정규직

Logixbuilt Infotech
Python Software engineer
Job description

언어 능력

한국어

Basic

영어

Basic

자격증

2018/01 Database Management System Award .

2018/01 Data Structure Excellence Award .

수상

2022/01 Most Diligent Employee

2019/01 Student of the Year

스킬

Python TensorFlow PyTorch NumPy SciPy Signal Processing CNN 1D ResNet

Supervised Learning Random Forest Classification Models LSTM Model Evaluation

Hyperparameter Tuning Pandas Data Preprocessing Feature Engineering PostgreSQL

Redis MongoDB Django FastAPI RestAPIs GraphQL Git AWS

K6 API Testing
