간단 소개

Artificial Intelligence Engineer specializing in Healthcare AI, Deep Learning, and biomedical signal analysis. Designed and developed production-grade machine learning models for early-stage disease diagnosis, including cardiac abnormality detection via ECG and Parkinson's disease analysis. Demonstrated expertise in time-series classification, CNNs, and 1D ResNet to deliver impactful medical solutions. Dedicated to driving advanced AI research and scalable data-driven systems for intelligent healthcare.

학력

~

(졸업)
학사
Master of Computer Applications (MCA)

~

(졸업)
학사
Bachelor of Computer Applications (BCA)

경력

~

정규직
Tech Corp
Artificial Intelligence Engineer

- Developing and deploying advanced machine learning models for healthcare applications

~

정규직
Software Solutions Inc.
Python Developer

- Developed scalable backend services using FastAPI and Django
- Optimized database queries and built RESTful APIs to support high-traffic web applications
